Features & Applications

The Prelux Saturn range provides a new level of innovation in maintenance free LED high bay lighting. By discarding the standard COB and opting instead for a smarter, more efficient SMD design, the Saturn range provides a smaller, lighter and more powerful solution.

The Saturn Magic is exceptionally efficient, producing a highly impressive 130Lm/W. The heat sink is designed to generate optimum airflow around the fixture providing superior temperature management and helping to avoid the accumulation of dirt and dust.
